

AMENDMENTS TO THE SPECIFICATION

I. Please replace the paragraph beginning on Page 16, Line 4, and ending on Page 16, Line 12, with the following amended paragraph:

Figure 6 is a cross-sectional view of lighting house 10 taken along the cross-sectional line 6-6. As shown in Figure 6, the retaining bracket 44 engages the pair of bracket openings 48 with the respective ends of bracket 44 projecting through the openings 48 allowing for ease in disengagement or disassembly of the brackets 44 from the housing 10. Additionally, ~~as shown in Figure 6~~, brackets 44 are dimensioned and shaped in order to fit securely against the cover members 38, 40 (and cover member 38 as shown in Figure 5). The brackets 44 are secured to cover members 38, 40 (and cover member 38 as shown in Figure 5) via securement means 56, illustrated as a threaded screw in Figure 6, although any securement means may be utilized.
